How to Use Camera Digital

sumber Gambar : pricebook.com

You need :

- ✓ A digital camera
- ✓ An object (a friend/classmate or something interesting you can find around the classroom or class yard)

Follow the steps below to take pictures:

1. Hold up the camera and centre the object in the LCD
2. Move closer or use the zoom control for the result you want
3. When you're ready to take the picture, hold the shutter halfway. It's very important, so the camera sets the focus, shutter speed and various other calculations. This may take a few seconds.
4. A light should appear that lets you know the camera is set to go.
5. Press shutter all the way down.

It may be necessary to turn off the LCD and use the view finder when there is extreme sunlight or to conserve battery life. The glare from the LCD does not work well with bright light.

Please choose whether this sentence is true or false based on the picture!

6. This text tells about how to take a picture using camera digital T / F
7. Press shutter to control the light T / F
8. The light appear when the camera is ready T / F

Please watch this video first!

After you watch the video, please arrange the sentence into procedure text correctly based on the video!
