

Tema: Suma y Resta de fracciones

Resuelve cada ejercicio, recuerda escribirlo en su mínima expresión.

1) $\frac{4}{5} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

2) $\frac{5}{6} + \frac{3}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3) $\frac{4}{8} - \frac{2}{10} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

4) $\frac{3}{4} + \frac{7}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5) $\frac{1}{4} - \frac{2}{10} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

$$6) \frac{3}{5} + \frac{7}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7) \frac{3}{8} - \frac{1}{10} = \underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$8) \frac{5}{6} + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$9) \frac{1}{2} - \frac{1}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$10) \frac{3}{5} + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$
