Intro

Bad Tech, an evil computer programmer, has released an electronic virus which is spreading across the world. The virus is infecting our computers and mobile phones with fake news stories. They are sent via Whatsapp, Instagram, email or any way possible. If you click on these stories, your device stops working immediately. With the help of a crew of evil computer programming agents, Bad Tech's plan is not just to destroy all the computers and mobiles in the world, but the whole internet! No more TikTok! No more Fortnite! No more Netflix! But you can stop that. Using the clues to help you, complete the different missions and save the internet!

Get started!

MISSION 1

1. BAD TECH'S AGENT: _____
