Part 2: Read this text and try to understand the words in bold. Then match them with the meanings.

People who work in medical **professions** **train** for many years. Doctors and nurses must **provide** clean **conditions** in hospitals to prevent **infection**. Good medical care can **transform** people's lives.

1. a medical problem that is caused by bacteria or viruses
2. completely change
3. give people something that they need
4. jobs that need special education or skill
5. learn the skills you need to do a job
6. the things that are around you

Now answer these questions:

1. Which four words relate strongly to medicine?
2. Which three words relate to careers/jobs/work?
3. Which words from the exercise are verbs?
4. Which word is an adjective?
5. What are all the other words?

You are going to listen to information about Florence Nightingale, 1820-1910. Read these sentences and predict if they are true or false. Then listen to check your ideas.

1. Florence Nightingale studied mathematics and science at school.
2. Nightingale took a team of nurses to Turkey in 1854.
3. She was called "The Lady with the Lamp" because she invented a new type of lamp.
4. She used diagrams like pie charts to explain her ideas.
5. One very big hospital in the UK is named after her.

Now, read the questions. Can you remember the answers?

1. What difficulty did Nightingale have early in her life?
2. What did Nightingale find when she arrived in Turkey?
3. Why were most soldiers dying?
4. What did Nightingale do after the Crimean War ended?
5. How do we remember Nightingale today?
