

SUDĒTIS 100 RIBOSE

1. Sudēkite.

$45 + 26 = \square$

$38 + 59 = \square$

$28 + 52 = \square$

$36 + 48 = \square$

$18 + 29 = \square$

$51 + 19 = \square$

$27 + 27 = \square$

$63 + 27 = \square$

$45 + 15 = \square$

$18 + 39 = \square$

$15 + 59 = \square$

$28 + 37 = \square$

2. Kokie skaitļi turi būtī tuščiūose langeliūose?

8		6
	5	
		2

3		
	6	2
		9

4	9	2
		6

6	7	11
		10

3. Parašykite paslēptus skaitļius.

$18 + \square = 91$

$46 + \square = 58$

$36 + \square = 72$

$19 + \square = 32$

$51 + \square = 65$

$36 + \square = 90$

$25 + \square = 60$

$19 + \square = 42$

$38 + \square = 63$

$36 + \square = 83$

$43 + \square = 71$

$46 + \square = 95$
