SPACE

CHOOSE THE CORRECT ANSWER (ESCOGE LA RESPUESTA CORRECTA).

Life in Outer Space

The first astronauts that went to space traveled on short **trips**, but these days they stay in **outer space** for several days or months. They live in a space station that travels around Earth. In the space station, astronauts work on scientific experiments. They are interested in studying the changes that happen in the human body and in plants in outer space. Astronauts do the same things they do on Earth like sleeping, eating, and exercising.

1. THE FIRST ASTRONAUTS TRAVELED ON SHORT.....

NIGHTS

TRIPS

BUSES

2. THE ASTRONAUTS LIVE IN A.....

SPACE STATION

AIRPORT

HOUSE

3. THEY STUDY THE CHANGES IN THE HUMAN BODY AND.....

ANIMALS

CLOTHES

PLANTS

4. THE ASTRONAUTS DO SLEEPING, EATING AND.....

COOKING

EXERCISING

WASHING
