Facilitador: Menéndez Julieta – calf ISEI - Inglés Técnico II

Name and surname : ..... Date: July 2023

ENGLISH FINAL EXAM – ISEI 2023

A) Read the dialogue. Are these sentences T (true) or F (false)?

A: So, what are you looking for? Something strong but flexible at the same time.
B: Yes, they can't be brittle.
A: They mustn't break under stress.
B: Exactly.
A: Do you use steel? That's strong.
B: You can make body implants from steel, but there's a big problem.

A: It is not resistant to corrosion?

B: That´s right. Even **stainless steel* will corrode over time. We need something durable.
A: What about nickel? Nickel doesn't corrode.
B: Yes, and it's ductile too.
A: What does ductile mean?
B: You can bend it lots of times and it doesn't break. But the problem with nickel is it's too soft. We make alloys with it though, like nickel cobalt molybdenum.
A: So you combine it with harder materials?
B: Yes, we do the same with titanium. Titanium is harder than nickel, but very expensive.
A: So, Do you use titanium in alloys too?
B: Yes, That's right.

***acero inoxidable**

1. El cliente está en busca de un material que no sea frágil. .....
