

# How do animals move?

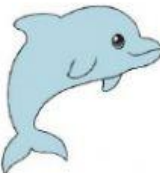

1. Complete this sentence.

|      |      |         |     |
|------|------|---------|-----|
| walk | swim | slither | fly |
|------|------|---------|-----|

Animals **move** in different ways. Elephants \_\_\_\_\_, flamingos \_\_\_\_\_, sharks \_\_\_\_\_ and snakes \_\_\_\_\_.

2. Put each animal in its corresponding place.

| walk | fly | slither | swim |
|------|-----|---------|------|
|      |     |         |      |

|                                                                                     |                                                                                     |                                                                                      |                                                                                       |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |  |  |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|

3. Read and choose the correct answer.

- Cats **walk** / **fly** / **slither** / **swim**.
