

# THE WATER CYCLE

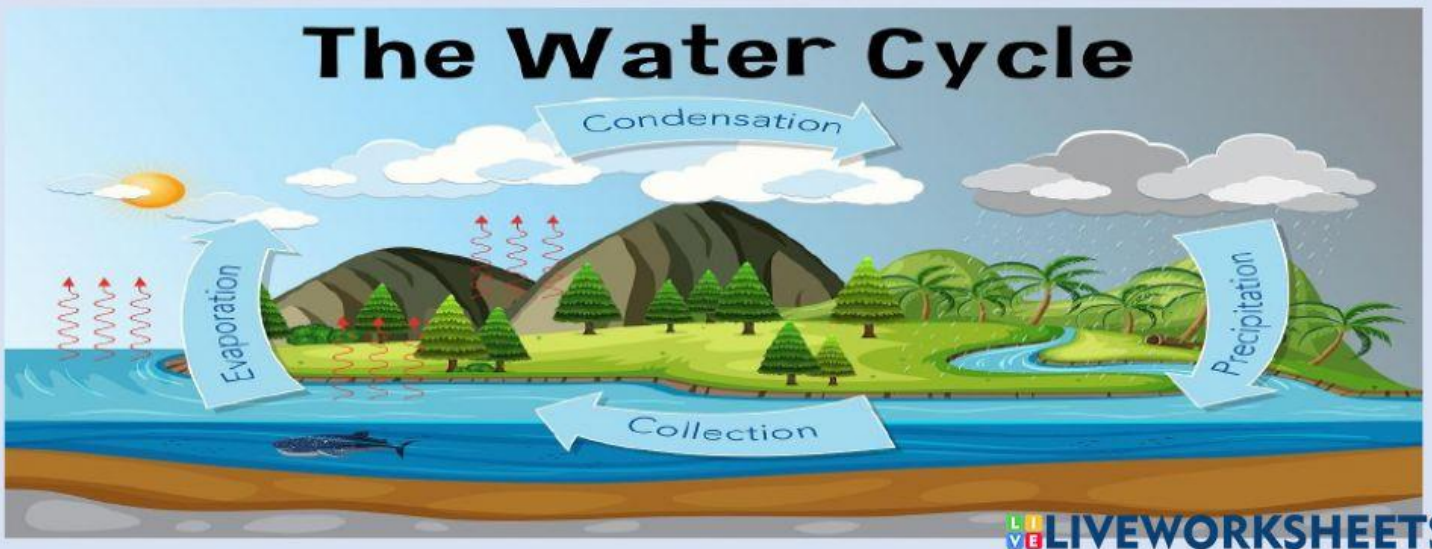

1. Select the state of water in these pictures.

2. Drag the names of the **processes** and **states** to the correct place.

3. Look at the picture and select True or False.

- Precipitation can be **rain** or **snow**.
- **Evaporation** is when water from oceans, seas and lakes **turns into** vapor and form clouds.
- **Precipitation** only happens in the sea.
- The **water** in the **clouds** is in **gas state**.
- The **water** in the **sea** is in **solid state**.
- **Evaporation** happens when the **liquid** water **gets cold**.
