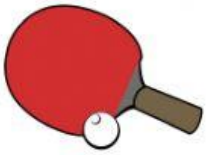
Road Tennis

The National Sport of Barbados

Do you like to play Cricket, Football or Netball; have you ever played Road Tennis?

Road Tennis is Barbados' national sport and it is the only sport to be invented in Barbados which is played all over the world.



The game was invented in the 1930's.
It can be played on a small court or on the road(street).

When the game first started, a tennis ball was used, but over time the ball was 'skinned' with the felt taken off to leave just the inside. Similarly, rackets are wooden - resembling large table tennis paddles without the rubber
