## Photosynthesis

### Word Box:

water ( $H_2O$ ), sugar, carbon dioxide ( $CO_2$ ), light, oxygen ( $O_2$ )

Photosynthesis is a process where plants use \_\_\_\_\_ from the sun. Then takes \_\_\_\_\_ through its leaves from the air and \_\_\_\_\_ from the soil. This process makes \_\_\_\_\_ which is also called Glucose and \_\_\_\_\_ which humans and living things use to breathe.

Did you know the reverse happens at night plants take in \_\_\_\_\_ and release \_\_\_\_\_ !
