However, today boats are more convenient because they have an engine that powers them.

Next came horses. Surprisingly it took 55,000 years after the invention of the boat to discover horses as a means of transportation. At first, horses were ridden without a saddle, also called riding bareback. But over time, riders used saddles to make traveling more comfortable and easier to control the horse. After that, it didn't take long for us to figure out we could use a wagon and a horse to help carry equipment and people.
