If we surf the web looking for pollution and environmental catastrophes, we will find out that every country in the world suffers them. This is a natural consequence of the struggle between development and environment.

Provided a country decided to live isolated from the rest of the world, living on what it can naturally grow and produce, it surely wouldn't be highly polluted. However, we all want exotic food and technological items from all over the world, so we have to pay the price.

Investing on electrical transport would benefit the environment a lot. Even more if this electricity came from a natural source of energy like wind, rivers and solar boards. It's difficult to achieve this because petrol companies will fight against these actions.

We also have to take care of our rivers and seas. We all have heard about factories throwing highly toxic substances to rivers, without minimizing their poisoning effects. A really strict law should be applied to fine these factories and make them change their policy.

**2. Choose the best conclusion by clicking on the correct paragraph below.**

On the whole, we need to consider what we a society can do to improve this situation. We also can do a lot! If, when possible, we bought larger packs of food, we would be producing less rubbish. And this is only an example!

In conclusion, the Internet has a lot of great things. For me, the best are finding information and learning online. What about you, what would you say are your favourite things about it?

Nevertheless, Foster's Hollywood offers delicious meals in an unbeatable atmosphere, so you should definitely give it a try. I promise you won't regret it.

Being a huge fan of traditional American fast food and restaurant styles, it's no wonder that my favourite restaurant in Granada is Foster's Hollywood.

Located smack in the middle of the city, this fast-food chain serves a wide variety of mouthwatering, American dishes at a reasonable price. These range from typical Tex-Mex nachos or French fries to more elaborate meals like traditional, homemade Bourbon steak. And if you're hungry, it's the perfect place to go, as their servings are absolutely huge!

Another cool thing about this place is its magnificent decor. If you're a film buff, you will quickly fall in love with this place, since all the walls are covered in famous movie posters! Apart from that, it's got a spacious dining hall, super friendly staff and an outdoor terrace which is absolutely fantastic on summer nights!

The only negative thing I can say is that it is right next to a gym, which sometimes makes me feel guilty for eating so much!

The Internet: A Great Invention

The Internet has changed the way we live. It started as something that we could access only through a computer, but nowadays it is everywhere. It's unbelievable, wouldn't you say?

One of the amazing thing about the world wide web is that you can look up anything you want and find out the answer straight away. Isn't that fantastic? For example, imagine you are arguing with your friends about how to do something. Easy solution! Go online and find the answer.

However, the greatest thing about the Internet is how you can learn tons of things very cheaply or even for free! In fact, my favourite website is [www.udemy.com](http://www.udemy.com), where people register to teach and learn about different things: music, website design, making apps, history, etc. So, I totally recommend it to everyone!
