Zebras

Zebras live in grasslands in Africa. They look like horses and they've got black and white stripes. Zebras are herbivores: they eat grass, leaves and fruit. They eat during the day and sleep at night. Zebras can hear very well and they can also see well at night. They can run fast, too. Baby zebras are amazing. They can walk when they are only 20 minutes old! And they can run when they are 1 hour old!

- ☐ Zebras live in America
