4TH GRADE – SCIENCE

PLANT ADAPTATIONS

INTERACTIVE WORKSHEET 05

I. Choose the following.

Underwater plants | Parasitic plants | Pine | Non-green plants | Insectivorous plants

1. Plants having cones with seeds instead of flowers. _____.
2. Plants that trap and eat insects _____.
3. Plants that remain completely submerged in water _____.
4. Plants that absorb food from dead plants and animals _____.
5. Plants that grow on other plants and often harm them. _____.

II. Match the adaptation to the plant type.

These plants are adapted to live in very cold places.

These plants trap and eat insects to get nutrients

These plants have roots that grow above the ground.

These plants have roots fixed to the soil of the waterbed but their leaves float on the surface of water.

These plants can live in very dry places as they have long roots to absorb the ground water

These plants grow in shallow waters but their leaves and stems are found growing out into the air.
