

My parents got married in 2007. I was born three years later on July 10, 2010. Then I went to the kindergarten in 2013. I was there for about 2 years, and then I became a pupil of primary school 35 and stayed there for 4 years. The teachers in this school are old-fashioned, so I found a very good private IT school called Step (Shag) and stayed there for 2 years. When a war in Ukraine started my online education continued in the worst school in the world (Harmony). I wasn't satisfied with the standards of teaching in it.

Next school year I go back to the IT school, and then I will move to the USA and earn 150 bln bitcoins and will never work again.
