

Lengkapilah tabel yang kosong dibawah ini dengan mengerjakan cara dibawahnya !

No.	panjang	lebar	tinggi	volume
1.	24 cm	18 cm	cm	5.616 cm ³
2.	48 cm	cm	20 cm	14.400 cm ³
3.	cm	18 cm	7 cm	6.300 cm ³
4.	56 cm	cm	45 cm	80.640 cm ³
5.	cm	60 cm	55 cm	280.500 cm ³

Contoh: $t = \frac{\text{volume}}{p \times l} = \frac{64.512}{56 \times 48} = \frac{64.512}{2.688} = 24 \text{ cm}$

Jangan lupa memberikan tanda titik untuk ribuan

Cara :

1. $t = \frac{\text{volume}}{p \times l} = \frac{\quad}{x} = \quad = \quad \text{cm}$

2. $l = \frac{\text{volume}}{p \times t} = \frac{\quad}{x} = \quad = \quad \text{cm}$

3. $p = \frac{\text{volume}}{l \times t} = \frac{\quad}{x} = \quad = \quad \text{cm}$

4. $l = \frac{\text{volume}}{p \times t} = \frac{\quad}{x} = \quad = \quad \text{cm}$

5. $p = \frac{\text{volume}}{l \times t} = \frac{\quad}{x} = \quad = \quad \text{cm}$
