

LAYERS OF THE ATMOSPHERE

Troposphere: this is where we live. Weather happens here.

Stratosphere: this is where commercial planes fly to avoid bad weather.

Mesosphere: this is the coldest layer. Protects Earth from meteors.

Thermosphere: the aurora borealis are formed here.

Exosphere: most satellites orbit in this layer.

The (1st) layer of the atmosphere from the Earth is the troposphere.

The (2nd) layer of the atmosphere from the Earth is the stratosphere.

The (3rd) layer of the atmosphere from the Earth is the mesosphere.

The (4th) layer of the atmosphere from the Earth is the thermosphere.

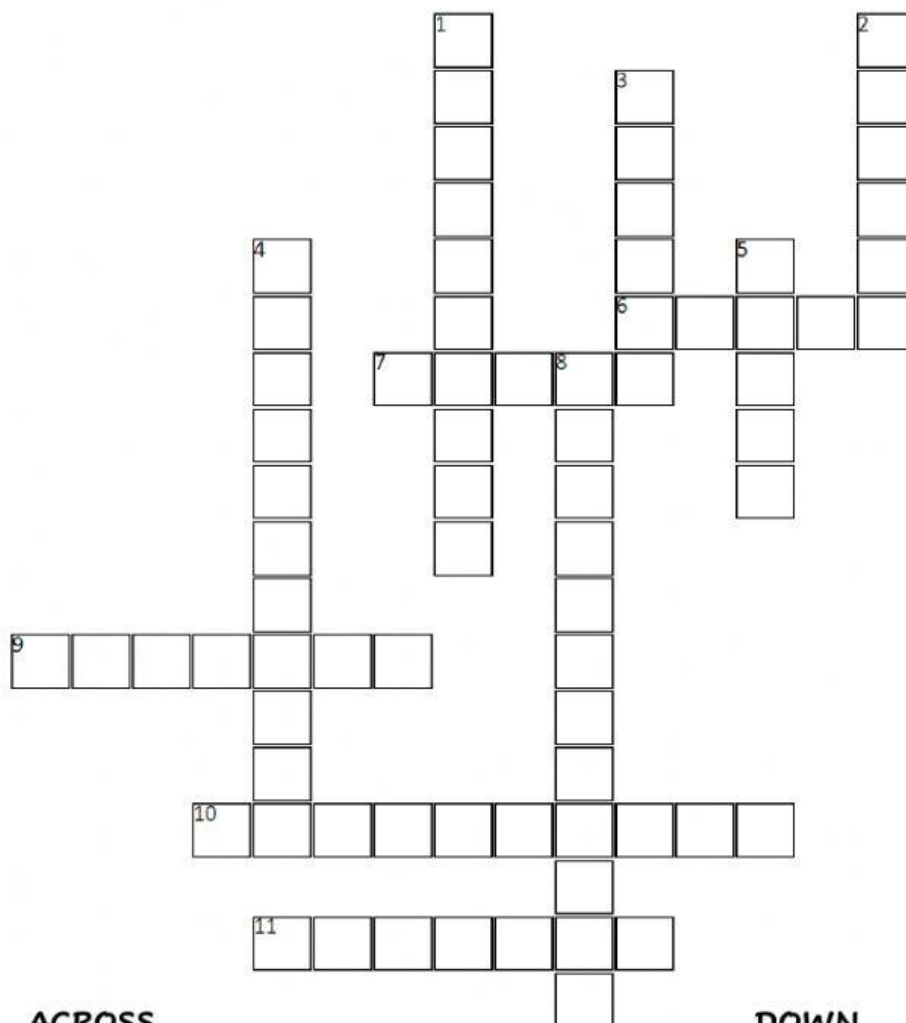

The (5th) layer of the atmosphere from the Earth is the exosphere.

Layers of the atmosphere
