

Write A, B or C in the table below.

Frogs are small, tailless amphibians that live in both water and on land. They have smooth, moist skin and long hind legs that they use for jumping. Frogs eat insects, worms, and other small animals.	Elephants are the largest land animals on Earth. Elephants have a long trunk that they use for many purposes, such as breathing, drinking, bathing, and picking up food. They are herbivores and eat a variety of plants such as grasses, leaves and fruits.	Eagles are large, powerful birds of prey that are found all over the world. Eagles are typically found in open habitats, such as mountains, forests, and deserts. They are carnivores and eat a variety of animals, including fish, mammals, and birds.
--	---	--

A. Frogs

B. Elephants

C. Eagles

15	Largest land animals that are herbivores.	
16	_____ are typically found in open habitats.	
17	Which animals have long hind legs?	
18	Small amphibians that live in both water and on land.	
19	Large bird that are carnivores.	
20	_____ have a long trunk.
