

## 9. HALVES AND QUARTERS

NAME :-----

SUBJECT : MATHS

CLASS :-----

MARK : 10

### Finding a quarter

To find a quarter of a number, halve it and then halve it again.

Example: find a quarter of 20.

Half of 20 = 10.

Half of 10 = 5      A quarter of 20 = 5

Find a quarter of these numbers by halving and then halving again:

- |                                            |                                             |
|--------------------------------------------|---------------------------------------------|
| 1. A quarter of 40 = <input type="text"/>  | 2. A quarter of 12 = <input type="text"/>   |
| 3. A quarter of 16 = <input type="text"/>  | 4. A quarter of 24 = <input type="text"/>   |
| 5. A quarter of 60 = <input type="text"/>  | 6. A quarter of 80 = <input type="text"/>   |
| 7. A quarter of 44 = <input type="text"/>  | 8. A quarter of 28 = <input type="text"/>   |
| 9. A quarter of 88 = <input type="text"/>  | 10. A quarter of 48 = <input type="text"/>  |
| 11. A quarter of 32 = <input type="text"/> | 12. A quarter of 100 = <input type="text"/> |
