

ICT: Keyboard Hand Position

Objective: I can use basic typing position when operating a keyboard.

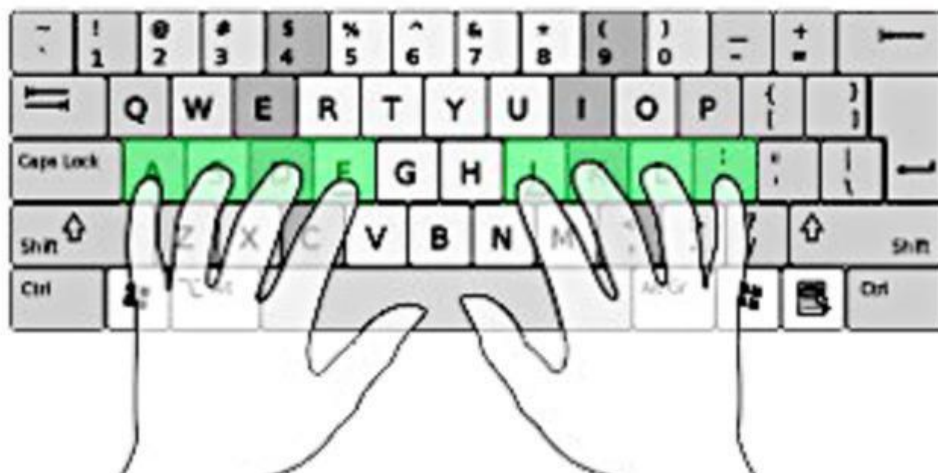

Choose all the correct keyboard positions below (6 points)

- Eyes on copy/monitor
- Eat ice cream
- Fingers curved and upright
- Wrists low
- Forearms slanted with keyboard
- Sit back in chair, back straight
- Feet on floor
- Sleep

When we type, we put the fingers of our left and right hand on specific letters (see below).

On the keyboard below, label the letters your left fingers and right fingers should be on when in the correct typing position (8 points)

After you submit, practice typing using the link. (posted to Teams)
