- ☐ Because Jack wants to know where it is.

## reading

## People with goals Gente con objetivos

Lee atentamente este artículo acerca de tres jóvenes que se fijaron objetivos claros en su vida. Completa luego el ejercicio de lecto-comprensión.

### Balamurati Krishna Ambati

At age three, Balamurati Krishna Ambati was badly burned and spent several months in the hospital. He decided then that he wanted to be a doctor. A few years later, he read in the *Guinness Book of Records* that the youngest doctor in the world was 18 years old. So he decided to become a doctor by the age of 17. Many people thought this was impossible, but at 11, Ambati was in college. He graduated from college at 14 and from medical school at 17. Now that he is a doctor, Ambati plans to go for advanced training in Boston.

### Catherine Charlton

Catherine Charlton is studying engineering at Cornell University, but she has already achieved an important goal in her life: She has worked for NASA (the National Aeronautics and Space Administration). Charlton's achievements are not only in engineering, however. She is also a successful pianist and composer. Charlton hopes to combine her talents for engineering and music someday. For example, she would like to design concert halls or manufacture pianos.

### Jasmin Sethi

The Scholastic Achievement Award is the test American students take to enter college. Each year, only a few students get a perfect score. One of those students was Jasmin Sethi. Her achievement was especially remarkable because she is blind. To take the test, someone read the test questions to her, and she gave the answers. She even solved difficult math problems in her head. Sethi has been the editor of her school newspaper and has organized food collections. She plans to go to a top university next year. Sethi would like to be a lawyer.
