## 二、閱讀測驗

21. Recently, I read a story about a rich man who thought money was the answer to all life's problems. He thought he could use it to buy precious things like love and time. In his mind, money made his son's engagement possible. This, in turn, made him believe even more in the power of money. What the rich man didn't realize, however, was that not all the money in the world could open his eyes and show him how wrong he was.

After reading the story, I started thinking about everything that money can't buy. I decided to make a list of five things, and put "love" and "time" at the top. Next, I wrote "truth," since no amount of money can change how things really are. Similarly, not all the money in the world can buy friends, so I put "friendship" down at number four. To complete my list, I only had to think of the rich man and how money had blinded him to the truth. "Knowledge," that's one more thing you just can't put a price on.

- ( ) (1) What's the main idea of this story? (A) Money is useful for buying precious things. (B) Rich men are blinded to the truth by money. (C) The power of money is greater than we might think. (D) There are many things that money can't buy.
- ( ) (2) Which of the following statements about the rich man in the story is **NOT** true? (A) He only had daughters and didn't have any son. (B) He saw money as the answer to many problems. (C) He thought he could buy love and time with money. (D) He had a firm belief in the great power of money.
- ( ) (3) Which of the following is **NOT** on the author's list of the things money can't buy? (A) Truth. (B) Family. (C) Friendship. (D) Knowledge.

23. Our closest neighbor in space is the Moon, which has been providing us with light at night for millions of years. Actually, the Moon doesn't make its own light; just like all the planets do, it reflects light from the Sun. We know this for a fact, but there are many other things we don't know about the Moon, such as how it originated.

There are several theories about the Moon's birth. One suggests that the Moon was created when an object crashed into the Earth. Known as Theia, this object was the size of Mars\*. When it hit the Earth, it threw pieces of the young planet's outer surface into space and created the Moon.

According to another popular theory, the Moon formed around the same time as the Earth, whose stronger gravity pulled the Moon into its orbit\*. Such a theory would explain why the Earth and the Moon have much of the same material. However, the Moon is much lighter than the Earth, which would likely not be the case if both began with the same heavy elements at their centers.

Businesses need fresh ideas in order to grow, and each member of a team has the potential to bring new ideas to the table. Teamwork is also good for problem solving. Members of a group have different life experiences, which enables them to view a problem from different angles and, through the exchange of ideas, to come up with creative solutions.

Finally, teamwork creates a system that ensures that the team will try its best to produce quality work and not fall behind schedule.
