Do you think so?

Think about the good and bad points of using computers, and make a list.

Here are two examples.

With computers we can do complicated calculations very, very quickly.

On the other hand, computers make us lazy – we don't do arithmetic in our heads.

Now listen to a conversation

Listen again. Which points do the people agree about?
Which points do they disagree about?
Write A for agree or D for disagree.

1 Playing games

2 Writing

3 Getting information

4 Communicating with people
