It's all right with .....

As long as you are by my side

Talk or just .....nothing

I don't mind your looks ..... lie

***I was ..... on the run***

***Finding out what I was looking for***

***And I was .....insecure***

***Just until I found***

Words often don't ..... easy

I never learned to show you the inside of me

Oh no my .....

You were always patient

Dragging out what I try to hide

**You, you were ..... on my mind**

**You, you're the ..... I've been living for**

**You, you're ..... everlasting fire**

**You're my ..... shining star**

The night's always a .....friend

A glass of ....., and the lights are low

You lying beside me, me full of love

And filled with hope....
