- Galileo could see the planets Jupiter _____ Venus with his telescope.

Galileo Galilei was an Italian physicist, mathematician, astronomer, and philosopher. He was a brilliant scientist, and is often called 'the father of modern science'.

PERSONAL LIFE

Galileo was born in Pisa, Italy. He was the first of six children of Vincenzo Galilei and Giulia Ammannati. His father was a famous musician.

Galileo's early education was in a monastery. Later, at the University of Pisa, he was first a student of medicine, and then a student of mathematics. From 1592 to 1610 he was a professor of mathematics and astronomy at the University of Padua.

Galileo was the father of three children – two daughters and a son – but he wasn't married to their mother.

SCIENTIFIC LIFE

Galileo could make excellent telescopes, and with them he could see moons going round the planet Jupiter, and the planet Venus going round the sun.

At the time, the belief was that the Earth was the centre of our universe, and that the sun went round the Earth. Galileo's theory was that the sun was the centre, and the Earth moved round it.

THE LAST YEARS

The Roman Catholic Church wasn't happy with Galileo's ideas. They were dangerous, because they were different from the ideas in the Bible.

In the last years of his life, Galileo was completely blind, and couldn't see anything. He died in his home in Florence in 1642. He was 77 years old.
