

TASK 1: Watch the video:

Why do some animals and plants no longer exist?

SELECT A, B, and/or C

1. Dinosaurs are... 🦖 🦕

a. extinct	b. alive	c. endangered
------------	----------	---------------

2. What is a synonym for: “endangered animals”? 🐯

a. an animal threatened by extinction	b. an animal that loves danger	c. an animal that is dangerous
---------------------------------------	--------------------------------	--------------------------------

3. What can cause the extinction of a species? 🗑️

a. overhunting	b. asteroid collisions	c. global warming
----------------	------------------------	-------------------

4. Which species are currently endangered? 😞

a. Mountain Gorilla	b. Gigant Panda	c. Black Rhino
---------------------	-----------------	----------------

What can we do to help the animals?

Complete and Match:

1. REU E 
2. RE UCE
3. ECY LE

	<p>a. to convert waste into material that can be used to remake the item, or to make something else.</p>	
	<p>b. to make smaller/less in amount</p>	
	<p>c. to use something again, either for its original purpose or repurposed for a different task.</p>	

TASK 2: Read and do the activities below.

Endangered Species:

POLAR BEAR

The polar bear is an endangered animal that lives in the Arctic. They have thick fur to keep them warm in the cold weather. Their diet consists mainly of seals, which they catch by waiting at holes in the ice.

Compared to other bears, polar bears are much larger and have longer necks. They are also great swimmers and can swim for long distances in search of food.

Unfortunately, due to climate change, the habitat of polar bears is shrinking. The ice is melting, which makes it harder for them to find food and raise their cubs. This is why it's

important to protect these beautiful animals and their habitat.

We must take action to help save the polar bear and other endangered animals from extinction. We can do this by reducing our carbon footprint and using less energy. We can also support organizations that work to protect these animals and their habitats. Let's work together to ensure that future generations can enjoy the beauty and wonder of these magnificent creatures.

Select the correct TITLE:

a. Saving the Polar Bear: Why It's Important

b. The Polar Bear: A Carnivorous Animal that Lives in a Desert

c. How to Save Endangered Animals with Your Thoughts

True or False?

FALSE	0. Polar bears are not endangered animals.
	1. Polar bears have thin fur to keep them warm in cold weather.
	2. Polar bears are smaller than other bears.
	3. Polar bears cannot swim long distances.
	4. Climate change is not affecting the habitat of polar bears.
	5. We can reduce our carbon footprint to help protect polar bears.
	6. We can support organizations that work to protect endangered animals.
