

Haz la descomposición polinómica de los siguientes números usando las potencias de 10.

$$235.184 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$230.105 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$845.300 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$403.562 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$300.400 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$123.321 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$120.003 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$987.000 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$

$$600.000 = \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square} + \square \cdot 10^{\square}$$
