

| Definition | The "easy" definition | What does it look like? | How is it written? |
|--|---|---|--------------------|
| A point has no <u>Dimensions</u> . | |  R | |
| A line extends in <u>One</u> dimension. | A straight path that runs indefinitely. | | Line AB |
| A plane extends in <u>Two</u> dimensions. | |  | |
| A line segment AB consists of <u>endpoints</u> A and B , and all the points on line AB that are <u>between</u> A and B . | Part of a line with 2 endpoints. | | |
| A ray AB consists of the initial point <u>A</u> and all the points on the line AB that lie on <u>opposite side</u> of A as point B . | | | Ray AB |

THINK ABOUT IT!Is there a difference between lines \overleftrightarrow{AB} and \overleftrightarrow{BA} ?Is there difference between \overleftrightarrow{AB} and \overleftrightarrow{BA} ?**Example 1:** Give all the names of the figures shown below.
