

PROPORCIONALIDAD DIRECTA

Resuelve las siguientes reglas de tres (simple directa).

$$\begin{array}{l} A \longrightarrow B \\ C \longrightarrow X \end{array}$$

$$\frac{B \cdot C}{A} = X$$

$$\begin{array}{l} 20 \longrightarrow 16 \\ 10 \longrightarrow X \end{array}$$

$$X = \frac{(\quad)(\quad)}{\quad}$$

$$X = \dots\dots\dots$$

$$\begin{array}{l} 62 \longrightarrow 31 \\ X \longrightarrow 28 \end{array}$$

$$X = \frac{(\quad)(\quad)}{\quad}$$

$$X = \dots\dots\dots$$

$$\begin{array}{l} X \longrightarrow 90 \\ 30 \longrightarrow 60 \end{array}$$

$$X = \frac{(\quad)(\quad)}{\quad}$$

$$X = \dots\dots\dots$$

$$\begin{array}{l} 34 \longrightarrow X \\ 85 \longrightarrow 95 \end{array}$$

$$X = \frac{(\quad)(\quad)}{\quad}$$

$$X = \dots\dots\dots$$
