

Maths Vocabulary

We should all know what the four main maths symbols mean, but sometimes, other vocabulary is used in place of **Add**, **Minus**, **Multiply** and **Divide**. In place of **Add**, people might say "What is the **Total** of?" and instead of **Divide**, people might say "What is this number **Shared** between a certain number?"

Look at the following vocabulary and drag it into the box that you think it is most associated with.

add more multiple of subtract plus sum divide total minus
altogether leave less take away difference between share
divided by share equally lots of equal groups of times multiply
product halve remainder multiplied by increase decrease double
left over

$+$	$-$
\div	\times
