

SUMMATIVE EVALUATION #3

MATH

Name: _____

Teacher: Ariel Camargo

Level: 4th Grade

Date: _____

Score: _____/30 pts

A. Match the object with the most likely measurement. (8 points)

● 1 cup

● 32 fluid ounces

● 4 quarts

● 300 gallons

B. Select the best measurement. (6 points)

1. 2 pints = _____ cups

4. 4 gallons = _____ quarts

2. 12 quarts = _____ pints

5. 5 quarts = _____ cups

3. 13 cups = _____ fluid ounces

6. 3 gallons = _____ pints

C. Type the best unit. (8 points)

centimeters (cm)

meters (m)

millimeters (mm)

kilometers (km)

2,400

100

15

8

D. Complete each conversion. (5 points)

1 5 kilometers = meters

3 33 centimeters = millimeters

2 2 meters = centimeters

4 86 meters = millimeters

5 5 kilometers = centimeters

E. Problem solving. (3 points)

- 1 Jordan is running in a 5-kilometer race. She has already run 2,000 meters. How many more meters does she need to run to finish the race?

Jordan still needs to run meters.
