

SUMMATIVE EVALUATION #3

MATH

Name: _____

Teacher: Ariel Camargo

Level: 4th Grade

Date: _____

Score: _____ /30 pts

A. Match the object with the most likely measurement. (4 points)

10

• 1 cup

1

- 32 fluid ounces

1

- 4 quarts

1

- 300 gallons

B. Select the best measurement. **(8 points)**

$$3. 13 \text{ cups} = \text{ fluid ounces}$$

$$2. \quad 12 \text{ quarts} = \quad \text{pints}$$

C. Type the best unit. (8 points)

centimeters (cm)

meters (m)

millimeters (mm)

kilometers (km)

2,400

100

15

8

D. Complete each conversion. (8 points)

1 5 kilometers = meters

3 33 centimeters = millimeters

2 2 meters = centimeters

4 86 meters = millimeters

E. Problem solving. (2 points)

 1 Jordan is running in a 5-kilometer race. She has already run 2,000 meters. How many more meters does she need to run to finish the race?

 Jordan still needs to run meters.

5 kilometers =

meters,

meters - 2,000 meters =
