

Fill in the blanks based on the provided text about forest facts:

- 1) Forests are like nature's big, green lungs. They take in carbon dioxide and turn it into fresh, clean _____.
- 2) The trees and plants in the forest provide cosy homes for creatures like _____, birds, rabbits, and red pandas.
- 3) Forests are also like grocery stores for animals, providing tasty _____ and leaves for them to munch on.
- 4) Forests are like a big, bustling city for wildlife, where everyone has a home and plenty of _____ to enjoy.
- 5) Forests have amazing plants and trees that can help when you're not feeling well, like the willow tree's bark, which can be used to make _____.
- 6) The forest is full of plants like _____ that can soothe your skin if you get a little scrape or a bee sting.
- 7) In the forest, there's a network of fungi called 'mycorrhizal fungi' that connects the roots of trees and plants underground, like nature's _____.
- 8) These fungi help the trees and plants talk to each other, share important stuff like water, nutrients, and even warnings about dangers like _____.
- 9) It's like the trees have a secret language and can help each other out when they need it, just like friends sharing information and having each other's _____.
- 10) So, the next time you're in the forest, think of it as a big, green community where everyone is connected and helps each other out, just like friends sharing information and having each other's _____.
