

Drag and drop .

Parts of a tree

branch
leaves
trunk
roots
limb

Functions of each part of the tree

trunk ●

- allows the leaves to be exposed to sunlight by stretching towards the sky

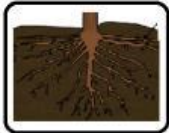

branch ●

- a main branch growing from the trunk of a tree

limb ●

- supports the branches and leaves of the tree

roots ●

- take in light , which the plant will use to produce its own food

leaves ●

- anchor the plant and takes in water from the soil
