## Complete the following table. (5 points)

Factors	Prime or Composite
	Factors

## Write the prime factorization of each number using exponents. (4 points)

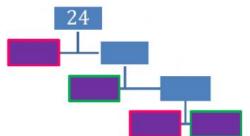

# Find the GCF and LCM by using the LISTING METHOD. Show your work. (4 points)

14	14
35	35
GCF of 14 and 35=	LCM of 14 and 35=

## Prime factorize to find the LCM and GCF of the following numbers. (4 points)

36=

24=\_\_\_\_

GCF of 36 and 24=\_\_\_\_\_

LCM of 36 and 24=\_\_\_\_\_

### Solve. (8 points)

$$7+3^3 \div 3 - 2 =$$

# Mohammad says that the prime factorization of $144=3\times3\times16$ . Is he right or not? Explain.

Solve the following problems. Show your work. (4 points)
