Subiectul V- 10 puncte
Read the text below and say which of the following sentences are true (T), false (F):

Agatha Mary Clarissa Christie is possibly the world's most famous detective story writer. She wrote 79 novels and several plays. Her sales outnumber those of William Shakespeare. However, behind her 4,680,000 words, there was a painfully shy woman whose life was often lonely and unhappy.

She was born in 1890 in Devon, the third child of Clarissa and Frederick Miller, and grew into a beautiful and sensitive girl with waist-length golden hair. She didn't go to school but was educated at home by her mother. Her father died when she was 11 and both she and her mother were grief-stricken.

During World War I, while she was working in a hospital dispensary, she learned about chemicals and poisons, which proved very useful in her later career. She wrote her first detective novel, *The Mysterious Affair at Styles*, in 1920. In it, she introduced Hercule Poirot, the Belgian detective who appeared in many subsequent novels. Her other detective was an elderly spinster called Miss Marple.

In 1914, at the beginning of the war, she married Archibald Christie, but the marriage was unhappy.

She enjoyed a very happy second marriage to Max Mallowan, an archeologist. Her detective skills were a help to him in his excavations in Syria and Iraq. By successfully staying out of the limelight, she ultimately found happiness with her beloved husband. She died peacefully in 1976.
