

Name: _____

Class: _____

13. 2 as a Factor

A. Visual learning

 $2 \times 3 = ?$	
<p>We can use a model.</p>  So $2 \times 3 = 6$	<p>Or we can use the repeated addition.</p> <p>2 times 3</p> $3 + 3 = 6$ So $2 \times 3 = 6$
<p>You can make the 2 times table to remember.</p>	

B. Independent practice

1. Choose the correct model then find the product.

2. Match the repeated addition with the multiplication. Then find the product.

$$9 + 9$$

$$2 + 2$$

$$6 + 6$$

3. Solve the problems.

There are 2 boxes, each box has 7 balls.

How many balls are there in all?

a/ Choose the correct model?

A.

B.

b/ Write the numbers.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are balls in all.

4*. Solve the problem.

I am a multiplication.

I have 2 as a factor.

The product is 16.

What multiplication I am?
