COFFEE PESTS AND FETILLIZATION

LISTEN TO THE AUDIO. THEN, CIRLCLE THE CORRECT WORD OR TERM FROM THE VOCABULARY YOU HEARD.

- To enhance the coffee plants' health, we apply specially formulated fertilizer to the soil.

- Regular inspections are conducted to identify any pest presence that could harm the coffee crops.

- We mix compost into the soil to improve its nutrient content, which is essential for coffee plants.

- Using organic fertilizer helps us maintain eco-friendly practices while nourishing our coffee plants.

- We carefully spread a blend of organic fertilizer and compost around each coffee plant to ensure they receive adequate nutrients.
