

7 Complete the questions with *are*, *is* or *there*. Then answer.

1. What color are the walls in your parents' bedroom? \_\_\_\_\_
2. What color \_\_\_\_\_ the door of your bedroom? \_\_\_\_\_
3. How many windows \_\_\_\_\_ in your living room? \_\_\_\_\_
4. How many chairs \_\_\_\_\_ in the dining room? \_\_\_\_\_

8 Look and complete the corresponding lines in the text balloons.

10

I run, I play soccer and I do tae-kwon-do.

I play to win. I'm the champion!

I love swimming and I sometimes win.

But winning is not important for me.

9 How do you play sports? Mark (✓) the opinion you agree with.

10 Read and circle the correct options.

# Be a Good Athlete!

Sports make you a healthy boy or girl. Follow this advice!

0. Practice / Don't practice every week.
1. Respect / Don't respect the other players.
2. Get / Don't get angry when you don't win.
3. Eat / Don't eat good food: salads, pasta and tuna fish.
4. Drink / Don't drink a lot of water to be hydrated.
5. Go / Don't go to bed late.
6. Keep / Don't keep your uniform clean.

11 Look at the pictures in the article. Can you see hidden messages?

## Challenges for Our Eyes

**W**e have two eyes in the front of our head. Our eyes can see in color. Can you see numbers in picture 1? That means that your eyes are seeing the colors correctly.

Our eyes and brain give us the ability to see distances between objects (3-D vision). This ability can also make us see things that are not really there. For example, picture 2 is called a stereogram. Can you read the secret message?

But sometimes the eyes and brain don't function 100%. Maybe you can't see in color or you can't see in 3-D. Some people see red and green as the same color and they have difficulty choosing clothes. Some people walk into objects because they can't see the distance correctly. And some people just need glasses to read or see in the distance. Life can be complicated when you don't see well!

If you have vision problems, an optometrist can help you.

12 Read the article and mark (✓) the main idea.

- You can test if your eyes work correctly. Maybe you need glasses.
- Human eyes are incredible, but some people's eyes are not perfect.
- Everybody can see 3-D images. You just need to practice.

13 Match the visual problems with the pictures.

- a person who can't see colors
- a person who can't see in 3-D
- a person who needs glasses

Stop and Think! Are you ready to start this year of English classes?
