

WORKSHEET - 4

NAME OF THE STUDENT : _____

CLASS : _____

SUBJECT: MATH

TOPIC: Length conversion (Mixed Concepts)

TIME :15mins _____

Students do the given work in your third term math class work note book(100 pages single line copy).

Please follow the steps shown in the video.

Convert Each Measurement to the Unit Indicated

Example: 1) **6.5km =-----m**

$$1 \text{ km} = 1000\text{m}$$

$$6.5\text{km} = 6.5 \times 1000 \text{ m} = 6500 \text{ m}$$

2) **6.5m =-----cm**

$$1 \text{ m} = 100\text{cm}$$

$$6.5 \text{ m} = 6.5 \times 100 \text{ cm} = 650 \text{ cm}$$

3) **6.5cm =-----mm**

$$1\text{c m} = 10\text{mm}$$

$$6.5\text{c m} = 6.5 \times 10 \text{ mm} = 65 \text{ mm}$$

1. **1.7 km** = -----m

2. **36 m** = -----cm

3. **0.9m** = -----cm

4. **6.5 cm** = -----mm

5. **505.30 km** =----- m

6. **10.20 m** = -----cm

7. 503.6 cm = -----mm

8. 600 km = ----- m

9. 56 m = ----- cm

10. 1.9cm = -----mm
