

- 1 You can get hold of me either by email or _____.
A cell phone B tablet C digital camera
- 2 There is no sound coming out of the _____.
A speakers B computer C tablet
- 3 Check out the pictures I took with my new _____.
A digital camera B MP3 player C e-book reader
- 4 Could you please turn down the _____ because I'm trying to study.
A DVD player B speakers C television
- 6 Don't forget to switch off the electric _____ before fixing that machine.
A electron B current C resistance
- 7 Copper _____ electricity because it is strong and ductile.
A circuits B conducts C charges
- 8 Try using 60 _____ light bulbs in this room.
A ohm B ampere C watt
- 9 Electricity in the US is 120 _____ whereas in Britain it is 240.
A amperes B volts C watts
- 10 Electrons flow from the _____ pole to the _____ pole.
A capacitance / inductance B reactance / impedance C negative / positive
- 11 _____ adjust the voltage coming into the appliance to the proper level and pump electricity through the appliance to keep it operating properly.
A Hertz B Capacitors C Transformers

12 _____ is the measurement of frequency and it is usually described as events per second.

A Hertz

B Polarity

C Inductance

13 Electrical _____, positive and negative, is present in every electrical circuit.

A rectification

B polarity

C impedance

14 _____ enable a worker to cut the protective coating off an electrical wire.

A Wire strippers

B Diagonal cutters

C Magnifiers

15 A _____ has a single blade whereas a Phillips has two blades in the shape of a cross.

A hammer

B flathead screwdriver

C wire stripper

16 A _____ is a tool that allows you to control circular force when putting in, removing or tightening a bolt or a nut.

A flathead screwdriver

B hammer

C torque wrench

17 Use the _____ to cut through thin wiring and grip small objects.

A needlenose pliers

B hex wrench

C Phillips screwdriver

18 Put a little _____ on a cloth and rub the wire until the grease disappears.

A super glue

B alcohol

C cooler spray

19 A _____ has two eyepieces and uses two beams of light to magnify an object under study.

A stereo microscope

B glue gun

C clip lead

20 A _____ is a device which firmly holds an object that somebody is working on and consists of two flat jaws, one fixed and one movable.

A bench vise

B magnet

C stereo microscope

21 A soldering iron is a hand tool which supplies heat to _____ the solder.

A bond

B melt

C remove

22 Always use a solder sucker to _____ large amounts of solder.

A bond

B melt

C remove

23 You should always keep the iron _____ clean because this means better heat conduction.

A component

B solder wick

C tip

24 The inside of the solder tube is filled with _____ which is a substance that keeps surfaces clean and aids in the soldering process.

A vacuum pump

B flux

C components
