

Event Report

On 11th December 2023, a Science Fair was organized at Western Side Secondary School, and it was super cool! The gym was like a big science playground, filled with _____ projects and lots of _____.

There were _____ displays everywhere. It felt like stepping into a world of science magic. Some _____ had flashing lights, and others made funny sounds. The air even smelled yummy because some students were showing off their _____ experiments!

There was a model of the solar system that twinkled with lights, and some students _____ how they cleaned water in a really cool _____. There was also a mini circus of electricity with lights dancing in a little circuit. It was like being in a science wonderland!

The best part was talking to the students who made the projects. They were so excited and knew a ton about their subjects. It was clear they put a lot of time and _____ into making their projects _____.

The judges, who were teachers and experts, had a _____ job deciding winners because every project was _____. But what I liked most was how the students were cheering for each other. It felt like one big science family.

At the end of the day, there was an _____ ceremony. Everyone was holding their breath to _____ who won. It was super fun to see the winners jumping with _____ and getting applause from everyone.

In the end, the Science Fair at Western Side Secondary School was a blast. I left feeling happy and _____ to be part of a school where _____ is so much fun. I can't _____ for the next science adventure!
