

## Light Intensity

1. \_\_\_\_\_ refers to the strength or amount of light produced by a specific lamp / light source.
2. \_\_\_\_\_ is an instrument that measures light intensity.
3. Light intensity is measured in \_\_\_\_\_
4. The properties of light include its \_\_\_\_\_ or strength, direction, and the frequency of the wavelengths.
5. As light travels \_\_\_\_\_ from a light source, it spreads out to cover a wider area and the intensity \_\_\_\_\_
6. Order the light sources from the brightest to the dimmest: torch, candle, table lamp, bicycle light
