20

Time allowance:

Ben's mum asked Ben to go to the shop for her. She gave him a bag. She gave him a list of the things to get. She wanted some bread, some eggs and some apples. Ben went to the shop and got all three things. On the way home Ben fell over. He dropped the bag. All the things fell out. The eggs broke. The apples rolled down a hill. A car ran over the bread. Poor Ben!

I. Answer the questions

1. Who asked Ben to go shopping? _____
2. What did Ben's mum give him? _____
3. What are three things that his mum want? _____
4. What happened to Ben on the way home? _____
5. What happened to the eggs? _____

An elephant is a very large animal. It eats leaves of trees and plants. It has a thick, grey skin. It has a long nose called a trunk. An elephant uses its trunk for picking up things. It's tail is very short. An elephant has two big ears. It also has two long teeth called tusks. An elephant walks slowly.

II. Read each sentence. Choose True or False

6. _____ An elephant is a small animal.
7. _____ An elephant eats leaves of trees.
8. _____ An elephant has grey skin.
9. _____ An elephant's nose is called a tusk.
10. _____ An elephant has a long tail.

11. _____ An elephant walks slowly.

A robot is a machine. But it is not just any machine. It is a special kind of machine. It is a machine that moves. It follows instructions. The instructions come from a computer.

Because it is a machine, it does not make mistakes. And it does not get tired. And it never complains. Unless you tell it to! Robots are all around us. Some robots are used to make things. For example, robots can help make cars. Some robots are used to explore dangerous places. For example, robots can help explore volcanoes. Some robots are used to clean things. These robots can help vacuum your house. Some robots can even recognize words. They can be used to help answer telephone calls. Some robots look like humans. But most robots do not.

Most robots just look like machines. Long ago, people imagined robots. Over 2,000 years ago, a famous poet imagined robots. The poet's name was Homer. His robots were made of gold. They cleaned things and they made things. But they were not real. They were imaginary. Nobody was able to make a real robot. The first real robot was made in 1961. It was called Unimate. It was used to help make cars. It looked like a giant arm. In the future, we will have even more robots. They will do things that we can't do. Or they will do things that we don't want to do. Or they will do things that are too dangerous for us. Robots will help us fight fires. They will help us fight wars. They will help us fight sickness. They will help us discover things. They will help make life better.

III. Choose the correct answer

12. As used in paragraph 1, we can understand that something special is NOT

- A. Normal
- B. Expensive
- C. Perfect
- D. tired

13. According to the author, robots may be used to
