

# SUDĖTIS IKI 100

## 1. Atlik sudėties veiksmus.

|                                                                                                     |                                                                                                           |                                                                                                           |                                                                                                           |
|-----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| $16 + \begin{cases} 4 \\ 24 \\ 64 \end{cases} = \begin{cases} 20 \\ \square \\ \square \end{cases}$ | $31 + \begin{cases} 19 \\ 39 \\ 69 \end{cases} = \begin{cases} \square \\ \square \\ \square \end{cases}$ | $28 + \begin{cases} 12 \\ 52 \\ 32 \end{cases} = \begin{cases} \square \\ \square \\ \square \end{cases}$ | $47 + \begin{cases} 43 \\ 13 \\ 23 \end{cases} = \begin{cases} \square \\ \square \\ \square \end{cases}$ |
|-----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|

## 2. Sudėk tris skaičius. Atsakymą rašyk tuščiame langelyje.

|                                                                                               |                                                                                               |                                                                                               |
|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| $\begin{matrix} 21 & 32 & 44 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$ | $\begin{matrix} 12 & 23 & 45 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$ | $\begin{matrix} 56 & 12 & 31 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$ |
| $\begin{matrix} 74 & 6 & 15 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$  | $\begin{matrix} 84 & 11 & 4 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$  | $\begin{matrix} 16 & 25 & 47 \\ \downarrow & \downarrow & \downarrow \\ \square \end{matrix}$ |

## 3. Užpildyk sudėties lenteles.

| +  | 34 | 28 | 55 |
|----|----|----|----|
| 16 |    |    |    |
| 45 |    |    |    |
