

REPASSEM FRACCIONS

MULTIPLICACIONS. Mira com es resolen:

$$\frac{4}{8} \times \frac{3}{3} = \frac{4 \times 3}{8 \times 3} = \frac{12}{24}$$

The diagram shows the multiplication of two fractions. The first fraction is 4/8 and the second is 3/3. Arrows indicate the cross-multiplication process: 4 multiplied by 3 to get 12, and 8 multiplied by 3 to get 24. The final result is 12/24.

1. $\frac{2}{8} \times \frac{2}{2} = \underline{\quad}$

2. $\frac{3}{3} \times \frac{4}{4} = \underline{\quad}$

3. $\frac{5}{9} \times \frac{2}{2} = \underline{\quad}$

4. $\frac{3}{7} \times \frac{5}{3} = \underline{\quad}$

5. $\frac{8}{9} \times \frac{5}{2} = \underline{\quad}$

6. $\frac{2}{6} \times \frac{7}{2} = \underline{\quad}$

7. $\frac{5}{8} \times \frac{4}{4} = \underline{\quad}$

8. $\frac{5}{7} \times \frac{2}{5} = \underline{\quad}$

9. $\frac{6}{8} \times \frac{2}{3} = \underline{\quad}$

10. $\frac{7}{9} \times \frac{2}{5} = \underline{\quad}$

Més endavant veurem com es poden reduir aquestes fraccions, ara per ara és important tenir clar com es fa la MULTIPLICACIÓ de les fraccions.
