

# TEST

## 1. Read the article and complete it with the words in the box.

breakthrough	carbon	creation	embryos	genetically	interfere	opponents
		organs	premature	species		

In 1996, a group of scientists in Scotland made a scientific (1) \_\_\_\_\_ which made the news across the world; they cloned a sheep named Dolly. Cloning itself had been around for a number of years and scientists had already cloned mice and frogs, but these were from (2) \_\_\_\_\_. What made Dolly so special was that she was cloned from the DNA of an adult. And, not only did she take after her mother, but she was in fact, a (3) \_\_\_\_\_ copy.

Scientists hailed the breakthrough and claimed that it would lead to many benefits including the ability to save endangered (4) \_\_\_\_\_, reproduce (5) \_\_\_\_\_ modified animals for farming purposes and even provide replacement (6) \_\_\_\_\_ that could be used for humans.

However, problems soon materialized with Dolly. It was claimed that she suffered from (7) \_\_\_\_\_ ageing and arthritis. This raised new questions about the validity of cloning.

There are, of course, other issues as well. Many people are frightened by the idea that someone might decide to clone an entire person thus creating a modern Frankenstein monster. Some (8) \_\_\_\_\_ of cloning say that we do not have the right to 'play God' and that we shouldn't (9) \_\_\_\_\_ with nature.

Whatever our take on the morality of cloning, it is quite clear that with the (10) \_\_\_\_\_ of Dolly, science has reached a new level.

## 2. Replace the underlined words with a word from the box.

alarmed	annoyed	astonishment	desperate	hesitant	hopeful	perplexed
---------	---------	--------------	-----------	----------	---------	-----------

1. You really shouldn't be frightened, it's not that dangerous. \_\_\_\_\_
2. She can be so timid sometimes. She really needs to learn to be more confident. \_\_\_\_\_
