

VAMOS A DAR EL CAÑONAZO nivel VI

$$61 - 28$$

$$\cancel{20} + \cancel{8} + \boxed{} + \boxed{} + \boxed{}$$

Diagram showing the decomposition of the minuend (61) into three parts: 20, 8, and a third part (represented by a box). The 20 and 8 are crossed out, indicating they are not used in the final calculation. The three parts are added together to find the result, which is shown in a green box below the sum of the three parts.

$$62 - 44$$

$$\cancel{40} + \cancel{} + \boxed{} + \boxed{} + \boxed{}$$

Diagram showing the decomposition of the minuend (62) into three parts: 40, a crossed-out box, and a third part (represented by a box). The 40 and the crossed-out box are crossed out, indicating they are not used in the final calculation. The three parts are added together to find the result, which is shown in a green box below the sum of the three parts.

$$73 - 47$$

$$\cancel{} + \cancel{} + \boxed{} + \boxed{} + \boxed{}$$

Diagram showing the decomposition of the minuend (73) into three parts: a crossed-out box, a second crossed-out box, and a third part (represented by a box). The first two boxes are crossed out, indicating they are not used in the final calculation. The three parts are added together to find the result, which is shown in a green box below the sum of the three parts.

$$51 - 23$$

$$\cancel{} + \cancel{} + \boxed{} + \boxed{} + \boxed{}$$

Diagram showing the decomposition of the minuend (51) into three parts: a crossed-out box, a second crossed-out box, and a third part (represented by a box). The first two boxes are crossed out, indicating they are not used in the final calculation. The three parts are added together to find the result, which is shown in a green box below the sum of the three parts.
