

B Who said it? Read and circle.

1. "I haven't finished looking at this website yet."
 - a. Emma
 - b. Tommy
2. "Sorry, I forgot!"
 - a. Emma
 - b. Tommy
3. "I haven't finished downloading these songs yet."
 - a. Emma
 - b. Tommy
4. "OK. Let me know when you're done."
 - a. Emma
 - b. Tommy

Are you almost
done with the
computer?

Just a...

OK. Let me know
when you're...

Yes, I just
Go ahead and use it.

Thanks!

1 energy

4 electricity

2 source

5 dam

3 wind turbine

6 solar panel

Clean Energy

People are using more every day. We use energy to drive our cars and to power our computers, phones, and TVs. Scientists are excited about three of natural energy. These energy sources are clean and will never run out.

Wind Energy

Scientists have designed that use strong winds to make energy. Some turbines make enough for one thousand homes. Many countries now use wind turbines for electricity.

Water Energy

Moving water can also make energy. Scientists have designed that make electricity on many rivers. Two of the biggest dams are in China and Brazil, but there are thousands of others around the world.

Solar Energy

Scientists have designed to turn energy from the sun into electricity. These panels are now on many buildings, where they collect solar energy.

In the future, people will use even more energy, but more of it will come from clean energy sources. When people use these sources, they help to keep the earth clean.

D Answer the questions.

1. How do wind turbines make energy?
2. What will people do in the future?
3. How do people use energy?
4. How does clean energy help the earth?
